

# INDIVIDUAL PLAYER DEVELOPMENT PLANS

Founded by brothers Garry Monk (former English Premier League manager) and Stuart Monk (an innovative coach and scout), Soccer Profile was launched in 2018 with subscribers to the platform now spanning six continents, from grassroots to professional academies.

Soccer Profile is a series of age-specific assessments consisting of multiple levels of difficulty, which combined with the power of the internet provides players and coaches of all ages, genders and ability an affordable opportunity to measure and support the long-term development of a player's technical and physical ability.

The platform has been endorsed by leading figures within the professional game, such as Brendan Rodgers (Leicester City FC, Manager), Roberto Martinez (Belgium National Soccer Team Manager), and Ryan Maye (Head of Coach Development at Aston Villa FC) to name a few.

If you would like further information on this platform, please contact Soccer Profile's Managing Director, Stuart Monk, via email: [stuart.monk@soccer-profile.com](mailto:stuart.monk@soccer-profile.com) (Subject line: 'USYS') or alternatively please visit [www.soccer-profile.com](http://www.soccer-profile.com).

# INDIVIDUAL PLAYER DEVELOPMENT PLANS

**Soccer Profile** has developed four match realistic age specific technical assessments that consist of multiple levels of difficulty, aimed at challenging players through their long-term development.

Each assessment comes with a demonstration video of how the assessment should be completed, and an instructional PDF on how to set up and score the assessment.

Four physical assessments have been developed, guided by the advice and expertise of former Liverpool FC head of fitness and conditioning, Ryland Morgans.

Ryland has also provided sport science support behind the assessments to help players fully understand their physical development potential.
